2. Tambahkan method `index()` yang mengembalikan view('dashboard') di DashboardController

```
File Edit Selection View Go Run Terminal Help
EXPLOER
SIK-APP
app
  Http\Controllers
    Controller.php
    DashboardController.php
  Models
  Providers
  bootstrap
  config
  database
  public
  resources
  routes
  console.php
  web.php
  storage
  tests
  vendor
  .editorconfig
  .env

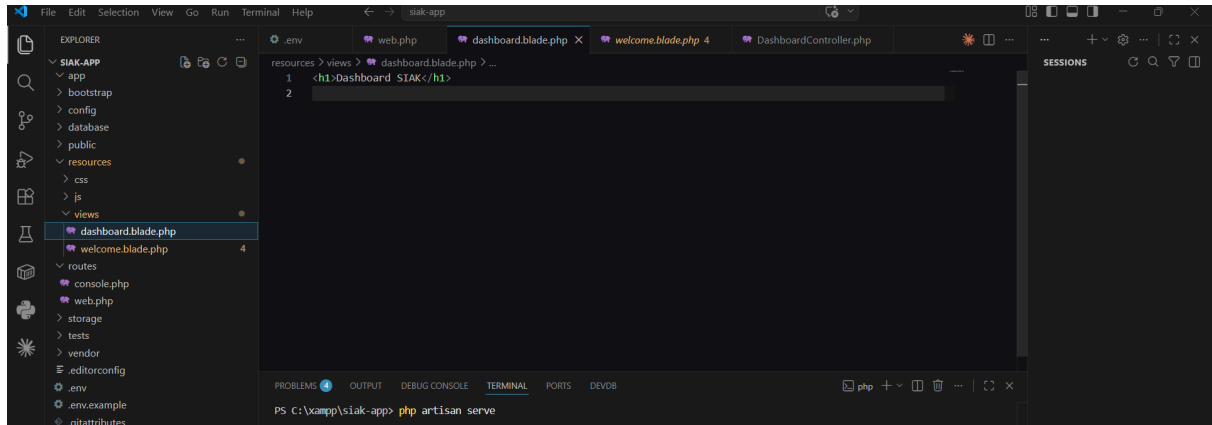

app > Http > Controllers > DashboardController.php > ...
1 <?php
2
3 namespace App\Http\Controllers;
4 use Illuminate\Http\Request;
5
6 class DashboardController extends Controller

```
File Edit Selection View Go Run Terminal Help
EXPLOER
